

Keep Your Idle Trucks Batteries Charged – Automatically!

50W Dash-Mounted Solar Kit for Semi Trucks

Dead Batteries = Lost Time + Extra Costs

- Trucks sitting for long periods often have drained batteries.
- Dead batteries mean service calls and delays.
- Repeated jump-starts shorten battery life and add replacement costs.

Introducing Sitting Solar – A Smart, Simple Fix

- 50W solar panel sits on the dashboard – no permanent installation needed.
- Plugs directly into the cigarette lighter or auxiliary power outlet.
- Maintains optimal battery charge while the truck is parked.
- Compact, portable, and easy to set up in seconds.

Save Money

No Dead Batteries

Plug & Play

How It Works

1. Place the panel on the dash.
2. Plug it into the truck's 12V outlet.
3. Park with confidence – the sun does the rest!
